## Steel Targets and Stands at CPF&G Club

by Rich Skowronski

Most members know that steel targets are permitted at CPF&G Club as long as the targets, their placement, and their use are in accordance with CPF&G Range Rules. For general shooting practice, steel targets are much more fun than paper targets because of the sound they produce when hit. The audible feedback also eliminates the need for a spotting scope to determine whether the target was hit.

What many members may not know is that the Club now has permanent stands for steel targets installed at the 25 yd, 50 yd, and 100 yd berms. Next time you are downrange, take a look at the black 2" x 4" rectangular receiving tubes near the target stands. Currently there are two stands at 25 yds, two at 50 yds, and three at 100 yds (on the left side). One or two more stands are planned for the right side at 100 yds this spring.

These tubes are designed to accept a common 2x4 to support a steel target. Members need only bring their 4' long 2x4 and (conforming) steel target, set it in the receiving tube, and they are good to go. Sure beats carrying a target stand back and forth from home to the target area.

Also, members can store their 2x4's on the table behind the 50 yd berm so the only item that a member must bring to the club is the target itself. Put your name and member number on the 2x4 so no one else uses it. Please, when your 2x4 has expired from too many hits, put it on the burn pile behind the 50 yd berm, do not put it in a trash can, in the dumpster or leave it on the range.

Please note that these permanently installed target holders are designed to be used with single targets that sit on a 2x4, they are not intended to be used with targets that hang by chains or straps. If you have gongs that hang by chains and straps, you will need to bring your own hanging system.

### Pistol vs Rifle

Steel targets may be used at the 25 yd berm only with PISTOL CALIBERS! This means that almost anything you shoot from a handgun plus Pistol Caliber Carabines (PCC) in common pistol calibers are acceptable. PCCs using 9mm, 10mm, .357, .45 ACP, .45 Colt, etc. are acceptable. As far as handguns, please do not use rifle calibers in "handguns" such as the Contender, AR pistols, and the like. All rifle calibers must be used at a minimum distance of 50 yds regardless of the type of gun used.

### Steel Targets and Ammunition

Quality steel targets are made from AR500, a steel alloy hardened to Brinell hardness of 500. Steel this hard cannot be cut or machined by conventional means, it is much too hard to saw, mill, or drill. AR500 targets will last almost forever when used with pistol calibers. AR500 targets will last a lifetime for most people, as long as they do not use magnum rifle calibers, ammo that has bullets containing steel, or are shot at short range.

(Continued on page 5)

(Continued from page 4)

Most people know that “green tip” AR-15 ammo (M855 and SS109) has a hardened steel penetrator in the tip of the bullet. Many people may not realize that most of the inexpensive rifle ammo in military calibers has steel in the bullet. Rifle ammo such as Wolf, Tula, Brown Bear, Silver Bear, etc. not only have steel cases, but also have steel jacketed bullets (sometimes referred to as “bimetal”). The bullets have a thin copper plate (sometimes called copper “flash”) on the order of .0002” thick on the steel jacket. This thin copper plating gives the deceptive appearance that the bullet is conventional copper jacketed lead. These bullets will damage a steel target about as much as a M855 with steel penetrator. If you are not sure what you have, put the bullet to a magnet.

Shooting steel bullets at AR500 will shorten target life, but the targets but will still last for years. Personally, I avoid steel bullets, not only because they are hard on targets, but are also hard on barrels.

### Steel Plate Target Etiquette

If you are at the range and see a steel target, do not shoot it unless you have the owner's permission. All steel targets (other than those used at club events such as 3-Gun) are privately owned. If you arrive at the range and see one, the owner is nearby. Shooting a target you do not own is akin to picking up someone's gun and shooting it. If you ask permission, most people will allow you to shoot their steel target, so long as you do not abuse it. For example, some people may not want steel jacketed or steel penetrator ammo, or magnum calibers used on their targets. It is a matter of simply respecting the property of others.

### Where You Can Get Compatible Targets

If you are interested in steel targets that are compatible with the permanently installed target stands, go to [www.RichsTargets.com](http://www.RichsTargets.com). Rich is often at the range; you may have seen steel targets in the back of his truck. If you need to contact Rich, email [richs@RichsTargets.com](mailto:richs@RichsTargets.com). 8” AR500 steel targets are available starting at \$45, just add wood.

## Weekly Indoor Work Parties

Work parties are held at the Club every week, year ‘round, on Monday evenings, from 18:00 to 20:00. Tasks may include replacing burned out light bulbs, sweeping up, sorting brass, general cleaning, repairs, and a myriad of other small jobs that constantly crop up. All Club Members are cordially invited to participate.

The indoor Pistol Range is closed during these sessions.

Country Pond Fish & Game Club is a *VOLUNTEER* organization.  
If no one volunteers, nothing gets done.

# Politics & Legislation

by John Faro, Political Junkie

The Second Amendment is under attack once again because of a disturbed individual's actions. The same anti-gun millionaires are spending money like water again to try and curtail your rights. They even boast that they and their minions are coming to confiscate your firearms!

Those in the firearms community that have been skeptical in the past that it can't happen here, hopefully have come to the realization that the threat to our God given rights are in danger. When a retired Supreme Court Justice advocates repeal of the Second Amendment, we are in real trouble.

The Governor of Vermont, a state that has been the bastion of firearm freedoms, has signed into law a ban on high capacity magazines. Bump stocks have been banned in Massachusetts and other states are considering the same type of ban. The bump stock ban is being touted on the federal level also. The attacks on AR-15 style firearms are reaching a deafening crescendo.

Billionaires are financing student protests across the country. High school students went from the "Tide Pod" challenge to being Constitutional experts overnight.

In the state of Florida, a bill has been proposed to lower the voting age to 16. Think back to when you were 16 and how much time you devoted to legislation and civic matters. If this bill passes there will be a huge voting block that is going to vote the way

their teachers and community activists recommend to them. In other words, Democrats, Progressives, and Anti-gunners will have the votes to do extreme harm to our rights and our country that will change our way of life for decades.

If we as law-abiding, gun owning citizens do not put aside our petty quarrels and join together as a cohesive political group the horizon ahead of us is truly dark. Yes, we have huge problems in the country, but the problem is not firearms, it's a social problem with our morals and the educational system our youth are exposed to. There are many educators out there that believe in the Constitution and our rights but there are many, many more progressives teaching and administrating our scholastic institutions that believe abridging our rights and freedoms is the only way to make our country safe.

Omnibus spending bill: The Republican leadership agreed to stick

the Fix NICS gun control into the omnibus. They did this over the objections of grassroots gun owners and pro-gun Congressmen. The Fix NICS language will send millions of additional names to the FBI background check system. Even worse, this will include the names of many Americans, including many veterans and older seniors, plus those with outstanding traffic tickets and medical marijuana cards.

The spending bill also included GOP's school safety proposal which prohibits money from being used for guns and gun training. None of these funds can be used to arm teachers or school resource officers. The bill turns our schools into undefended shooting galleries for criminals. (Source - Gun Owners of America)

These are the opening salvos in the gun-grabbers new efforts to restrict your rights. Don't let it happen!
